AUTHOR INDEX *

Volume 6 (1986)

Bahr, H.-A. and H.-J. Weiss, Heuristic approach to thermal shock damage due to single and multiple crack-growth (1) 57–62
Bandyopadhyay, K.K., see M.K. Kassir (3) 197–206
Bargmann, H.W., On the time-dependence of the erosion rate—a probabilistic approach to erosion (3) 207–215
Berns, H. and L. Weber, Ultrasonic evaluation of fatigue crack growth of high strength steel at ambient temperature and below (1) 11–19
Bulloch, J.H., Fatigue crack growth studies in rail steels and associated weld metal (2) 75–84

Chang, C.I., Thermal effects on polymer composite structures (2) 113–120
Chipperfield, C., see G. Kohler (1) 39–44
Chow, C.L., C. Ouyang and X.Q. Lu, Nonlinear mode II crack-tip fields for some Hookean materials (3) 217–222

Ellyin, F., Stochastic modelling of crack-growth based on damage accumulation (2) 95–101

Haddad, Y.M., A stochastic approach to the internal damage in a structured solid. Part 1: Theoretical model (3) 175–185

Ilic, S. and J.F. Williams, Compression failure modes in composites (2) 121–127

Kassir, M.K., K.K. Bandyopadhyay and P.A. Phurkhao, Some transient coupled thermoelastic crack problems (3) 197–206
Kohler, G., R. Whitfield and C. Chipperfield, Heat affected zone COD testing (1) 39–44

Lam, Y.C., see J.F. Wiliams (1) 21–28
Lee, Y.D., see G.C. Sih (2) 129–138
Leevers, P.S., Crack front shape effects on propagation stability in thermosetting polyesters (1) 45–55
Liu, H.W. and Y. Oshida, Grain boundary oxidation and fatigue crack growth at elevated temperatures (2) 85–94
Lu, X.Q., see C.L. Chow (3) 217–222
Lung, C.W. and Z.Q. Mu, Defect enhanced diffusion process and hydrogen delayed fracture in high strength steels (3) 171–174
Mu, Z.Q., see C.W. Lung (3) 171–174

Orringer, O., Structural integrity assessment in the transportation sector (2) 63–74
Oshida, Y., see H.W. Liu (2) 85–94
Ouyang, C., see C.L. Chow (3) 217–222

Phurkhao, P.A., see M.K. Kassir (3) 197–206
Pindera, J.T. and M.-J. Pindera, On the methodologies of stress analysis of composite structures. Part 1: State of the art—phenomenological and physical methodologies (3) 139–151
Pindera, J.T. and M.-J. Pindera, On the methodologies of stress analysis of composite structures. Part 2: New experimental approaches (3) 153–170
Pindera, M.-J., see J.T. Pindera (3) 139–151
Pindera, M.-J., see J.T. Pindera (3) 153–170

Russo, R., Theorems in linear elastodynamics for plane cracked bodies (3) 187–195

Sih, G.C. and Y.D. Lee, Tensile and compressive buckling of plates weakened by cracks (2) 129–138
Sih, G.C. and D.Y. Tzou, Arrest characteristics of an impacted crack dissipating plastic energy (1) 29–37
Sih, G.C. and D.Y. Tzou, Heating preceded by cooling ahead of crack: macrodamage free zone (2) 103–111
Skorupa, A., see M. Skorupa (1) 1–10
Skorupa, M. and A. Skorupa, Fatigue life prediction of welded components (1) 1–10

Tzou, D.Y., see G.C. Sih (1) 29–37
Tzou, D.Y., see G.C. Sih (2) 103–111

Weber, L., see H. Berns (1) 11–19
Weiss, H.-J., see H.-A. Bahr (1) 57–62
Whitfield, R., see G. Kohler (1) 39–44
Williams, J.F. and Y.C. Lam, The quantification of crack closure based on a contact stress intensity factor (1) 21–28
Williams, J.F., see S. Ilic (2) 121–127
